

CREATING INCLUSIVE LEARNING

Inclusive learning environments are spaces where all individuals are respected, treated equitably, are invited and welcomed to contribute, and have the same opportunities to achieve.

*How do I create an **inclusive** learning environment?*

Whether your learning activity is virtual, in-person, or hybrid, use the Creating Inclusive Algorithm. This tool is a web-based interactive algorithm that guides you, step-by-step, through the inclusive learning assessment.

Select the link or scan the QR code for the Creating Inclusive Algorithm. If you desire to provide perspective around inclusive learning strategy awareness, intention, and actual change over time, opt-in to the IRB research study **Impact of an Interactive Algorithm on Inclusive Learning in Nursing Professional Development: A Mixed Methods Approach** before starting the algorithm.
